Enter the Céliane™ era

L¹ legrand®

Balanced and user-friendly...

Céliane stands for balance between form and function through
its combination of circle and rectangle.
An innovative range of colours and materials brings
a new esthetic dimension.
You can freely create your own personal style.

Céliane brings you a new, user-friendly way
to control your lighting.
Forget the traditional switch's function of simply turning
on and off, and discover a whole new gestural language for
lighting control you will enjoy. To switch on, switch off or dim
the light, let your fingers choose the motion they prefer: a
press, a tip, a soft touch...
Control your light in your very own way.

...technology at your service.

Let the rhythm
of your home echo your own

Your home reflects your style, it lives at your pace.

Your installation should match your requirements, enhancing your comfort and leisure while ensuring your safety, simply and discreetly. Why not go for a single combined control?
Céliane supports your preferences and offers new options.

All our switches are fitted with LED indicators, which last longer and use up less energy. They are designed to control energy-efficient, e.g. compact fluorescent, lamps.

Various Céliane* products will enable you to control and cut your everyday energy consumption.
*They are identified by a green logo you will see throughout this brochure.

Concentrate and optimise

Numerous connection and lighting points in the minimum amount of space.

Control of 5 lighting points on one plate

+ Céliane advantages

You can control all the
lighting in one area,
from one compact point.
**Control of 5 lighting points
on one plate**

You can be certain of having plenty
of sockets on the work surface,
ensuring they don't take up too
much space.
Quadruple prewired sockets

L7 legrand

Protect the environment and save money

Manage your budget by reducing your energy consumption and improve your comfort - fitting in with how you live.

3.5 inches touch screen in «energy management» mode

⊕ Céliane advantages

Instant management of the
heating when windows are
opened, and display
of consumption.
Temperature control unit and sensor

Personalised programming
to reduce heating consumption.
Programmable room thermostat

legrand

Warn and protect

You can feel confident in your home with detectors that will warn you if necessary.

Alarm central unit

Céliane advantages

Céliane intruder detection linked to a powerful alarm signal (105 dB) and to a dialer for a remote control.
Caption: wired central alarm unit and siren

Audible or visual warning if there is a leak (gas, water) or smoke. A solenoid valve automatically shuts off the circuits in question.
Gas, flood and smoke detection devices

Simple to control through keypads and without battery badges.
Display keypad & transponder reader

Lªlegrand

Identify and welcome

With the colour video door entry system, you feel safe. You can identify your visitors and speak to them remotely, and make them feel welcome by switching on your external lighting.

Colour video door entry system

Céliane advantages

Identify visitors in colour on the screen, talk hands free, open the door with a single action, with the possibility of switching on external lighting to illuminate the entrance.
Colour video door entry system with 3.5 inch central screen

Speak to visitors and open doors remotely.
Audio door entry system

Personalisation of how the arrival of visitors is indicated: 13 melodies, adjustable volume.
Chime

legrand

Improve or enhance

It is simple to add a control function without having to route any wires or damage walls.

⊕ Céliane advantages

Make improvements without damaging the walls using simple wireless functions.
Simple radio light switch, radio centralised roller blind switch

Add a simple scenario control system: lighting and roller blinds that operate together.
4-scenario radio control

Possibility of adding a Céliane Wi-fi access point.

Control and manage

An all-in-one system! You can control all the functions in your house from a 10 inch screen. For example, manage all the scenarios, identify and speak to your visitors or get information on the status of the detectors installed in you house, all from this one central point.

Multimedia touch screen (10'' screen)

Céliane advantages

Manage all your home automation functions from the TV screen via the multimedia interface.
Multimedia interface

With the ¨OpenWebNet¨ open protocol, you can control the system from your favourite mobile, smart phone or iPhone.
Open web net server
