1. Cash flow from operations is defined as the sum of net cash from operating activities and change in working capital requirement.
2. Based on a working capital requirement representing $10 \%$ of the last 12 months' sales, and whose change at constant scope of consolidation and exchange rates is adjusted for the half year (H1 2013 reported figures unadjusted for the half year: $€ 316.9$ million and $14.1 \%$ ). Normalized free cash flow expected to be between $12 \%$ and $13 \%$ of sales for 2014 full year, taking into account usual seasonality.
