Legrand strengthens its positions in digital infrastructure by purchasing\textsuperscript{1} Server Technology, Inc.

Legrand is pursuing its development with bolt-on\textsuperscript{2} acquisitions and today announced the purchase\textsuperscript{1} of Server Technology, Inc., a US frontrunner in intelligent PDUs\textsuperscript{3} for datacenters.

Legrand is already present in the datacenter market through companies specializing in VDI\textsuperscript{4} cabinets (Ortronics, Electrorack and AFCO Systems Group in the United States, Aegide/Minkels in the Netherlands, SJ Manufacturing in Singapore and Valrack in India), in PDUs\textsuperscript{3} as well as KVM\textsuperscript{5} switches and their applications (Raritan in the United States) and in pre-terminated solutions (Lastar/Quiktron in the United States). The Group thus rounds out its product offering in the buoyant datacenter market by adding Server Technology, Inc.’s range of intelligent PDUs\textsuperscript{3}.

More generally, Legrand is strengthening its presence in the growing market for digital infrastructure, one of the Group’s four buoyant new business segments\textsuperscript{6}, driven by the rise in data flow volumes, linked in particular to growth in connected objects and rising demand for ever more energy-saving solutions.

Based in Reno, Nevada, Server Technology, Inc. has some 200 employees and annual revenues of over $110 million.

\textsuperscript{1} Subject to standard conditions precedent.
\textsuperscript{2} Acquisitions that complement Legrand’s activities.
\textsuperscript{3} PDU: Power Distribution Unit.
\textsuperscript{4} Voice-Data-Image.
\textsuperscript{5} KVM: Keyboard, Video and Mouse.
\textsuperscript{6} Digital infrastructure, energy efficiency, assisted living and home systems.
