

SDG 17 : REVITALIZE THE GLOBAL PARTNERSHIP FOR SUSTAINABLE DEVELOPMENT

KEY ISSUES AND OBJECTIVES TO WHICH LEGRAND CONTRIBUTES

Technology

17.7 Promote the development, transfer, dissemination and diffusion of environmentally sound technologies to developing countries on favourable terms, including on concessional and preferential terms, as mutually agreed

Every year, Legrand sets up a **training program** in India to help unskilled electrical installers become independent technicians. The Group provides tools and training, enabling these people to move from subcontractor to self-employed status, guaranteeing a better standard of living and better quality of their electrical installations. Each year, between 2,000 and 2,500 people are trained.

Multi-Stakeholder partnerships

17.16 Enhance the Global Partnership for Sustainable Development, complemented by multi-stakeholder partnerships that mobilize and share knowledge, expertise, technology and financial resources, to support the achievement of the Sustainable Development Goals in all countries, in particular developing countries

In the countries where the Group operates, each subsidiary forges **research partnerships with clusters and competitiveness centers**, as well as with research laboratories and universities. In this way, Legrand promotes the development of skills among future professionals in its sector, by supporting the creation of **specialized courses** and promotes local economic activity by developing and marketing innovative solutions through start-ups and SMEs. Since 2014, 116 **innovation partnerships** have been concluded.
