SDG I3: TAKE URGENT ACTION TO COMBAT CLIMATE CHANGE AND ITS IMPACTS

13 CLIMATE ACTION

KEY ISSUES AND OBJECTIVES TO WHICH LEGRAND CONTRIBUTES

ENERGY EFFICIENCY

ENVIRONMENTAL INVESTMENTS

RISKS AND
OPPORTUNITIES
RELATED TO CLIMATE
CHANGE

GHG EMISSIONS

13.1 Strengthen resilience and adaptive capacity to climate related hazards and natural disasters in all countries

13.2 Integrate climate change measures into national policies, strategies and planning

13.3 Improve education, awareness-raising and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning

To maximize awareness and engage its employees in positive environmental actions, Legrand organized two eco-gesture campaigns in 2021 and 2022 for all its staff. Simple reporting on straightforward actions enabled over a hundred employees to become eco-employees or eco-ambassadors. These campaigns are supported by training modules and dedicated days. Local initiatives are emerging in various regions worldwide, such as in the United Arab Emirates, where employees gather annually to clean a nearby site, or in countries where employees organize tree planting activities.

Energy efficiency principles are implemented in the construction, renovation, and maintenance projects of the Group's sites.
