**Energy sobriety:
Legrand doubles its goal of reducing its own energy
consumption by 2023 while facilitating savings for its customers**

Legrand is actively contributing to the global effort to reduce energy consumption by accelerating its commitments to reduce its carbon footprint and by offering its customers the possibility, via a wide range of products and solutions, to better control their energy consumption.

Double our own consumption reduction target

While the Group's CSR roadmap calls for an 8% reduction in its own energy consumption between 2021 and 2023, this objective has now been doubled to reach a 15% reduction, with the main levers being the modernization of lighting systems, the regulation of heating, the simplification of eco-actions for its employees, and the acceleration of initiatives in terms of insulating buildings and deploying renewable energy production on its sites.

Enable individuals and businesses to better control their energy consumption

For its customers, the Group offers a variety of solutions enabling them to automate their eco-actions (e.g. monitoring and thereby better managing their consumption by controlling their temperature, lighting, etc.) and thus to quickly, easily and significantly reduce the consumption of commercial, industrial and residential buildings.

In the same spirit, Legrand is a partner in France of the [Ecowatt](#) initiative, which aims to encourage individuals, businesses and local authorities to adapt their electricity consumption and limit it during energy peaks by adopting a more frugal approach.

"Faced with the collective priority of energy sobriety, we must mobilize by reducing our own consumption, but also by offering companies and individuals the means to massively deploy simple energy management solutions that make it possible, for example, to significantly reduce consumption in the residential sector." declared Benoît Coquart, CEO of Legrand.

KEY FINANCIAL DATES:

- 2022 nine-month results: **November 3, 2022**
“Quiet period¹” starts October 4, 2022
- 2022 annual results: **February 9, 2023**
“Quiet period¹” starts January 10, 2023
- General Meeting of Shareholders: **May 31, 2023**

ABOUT LEGRAND

Legrand is the global specialist in electrical and digital building infrastructures. Its comprehensive offering of solutions for commercial, industrial and residential markets makes it a benchmark for customers worldwide. The Group harnesses technological and societal trends with lasting impacts on buildings with the purpose of improving life by transforming the spaces where people live, work and meet with electrical, digital infrastructures and connected solutions that are simple, innovative and sustainable. Drawing on an approach that involves all teams and stakeholders, Legrand is pursuing its strategy of profitable and responsible growth driven by acquisitions and innovation, with a steady flow of new offerings—including products with enhanced value in use (faster expanding segments: datacenters, connected offerings and energy efficiency programs). Legrand reported sales of €7.0 billion in 2021. The company is listed on Euronext Paris and is notably a component stock of the CAC 40 and CAC 40 ESG indexes. (code ISIN FR0010307819).
